EDUCATION

Systems Development - AMS

I completed a Technical High School program integrated with Systems Development through the AMS (Articulated Secondary-Higher Education) model at ETEC Zona Leste, from January 2023 to December 2025. The program combined secondary education with technical training in Systems Development.

Systems Analysis and Development - AMS

I am currently pursuing a degree in Systems Analysis and Development (Technologist) through the AMS program at FATEC Zona Leste, from January 2026 to December 2027.

ACADEMIC PROJECTS

FarmFeeding: A system for managing agricultural products, developed with React and Firebase, including authentication, database integration, and organization of business rules.

Booker's Galaxy: A web platform developed in PHP focused on accessibility for visually impaired people, with an emphasis on usability, backend structure, and data persistence.

SafeView: Solution for reducing blind spots in large vehicles, using C++, Python, and React Native, integrating processing logic and mobile interface.

COMPLEMENTARY COURSES

- CyberSecurity - IBM Skillsbuilds | August 2025
- Artificial Intelligence - IBM Skillsbuilds | August 2025
- Introdução a React - TIC Trilhas/Venturus | April 2025
